

Projects

Mobilize produce construct

ITCSPL provide a total solution to its customers in infrastructure development projects for on-site production of concrete blocks as per client's specification.

We mobilize our state of the art concrete block plant and machinery to the project site for facilitation of on-site production, handling and fixing of SRW blocks, Paving blocks and other blocks as per client's specification. The main advantages are to cut down the transportation cost and time.

Advantages of on-site production:

1. Our state of the art plant and machinery installed at project site in a day's time.
2. Transparency in execution of projects.
3. Easy interaction, monitoring of process time to time by clients.
4. Fore mostly, it saves a lot on transportation cost and time.

ITCSPL have been associating with the following our for the past 15 years.
